Letter No. 05.03.01-000828

Subject: Deck Drainage CCO 54 Erosion Control

Dear Mr. Coupe,

The Department would like to clarify erosion control methods from Letter No. 05.03.01-000744, dated September 26, 2006. For the erosion control portion of the Lump Sum costs requested, please use the following turf reinforcement mat as listed below instead of hydro-seeding and utilizing plastic sheeting cover. The turf reinforcement mat to be used is "Pyramat", specifications as attached. A light pea gravel should fill in 50% of the voids, this will be used to provide weight and scour protection.

The area to be treated is 2 meters on each side of the north drip line for the entire "Goat Slope" that runs from Bent 48 to Bent 49, approximately from "EM" line Sta 51+50 southeast to "EDR1" line Sta 51+80.

Please submit Lump Sum costs for Open Graded AC (OGAC) as listed in Letter No. 05.03.01-000744, dated September 26, 2006, as well as Rock Protection as listed in enclosure 1/3 of the above mentioned letter.

If you have any questions, please contact me at (510) 622-5183.

Sincerely,

<<< ORIGINAL SIGNED >>>
