Subject Brief Report: 6/1/2007

- Mazen, Venkatesh, Jim, and Ivsted SPCC's facility at Xitang town. The facility is south east of Shanghai and the ride to the facility from Pudong is about 2 hours.
- The facility is larger than the existing facility and the one, and only, line is producing PPWS. The line dedicated for SAS is still being constructed.
- The structure that is going to accommodate the laboratory and office is under construction.
- After the visit, we went to SPCC's office in Pudong for a meeting. In the meeting, METS notified ABF and SPCC that the facility at Xitang received a contingent pass because the facility doesn't have the production line and laboratory in function. METS reminded SPCC and ABF to notify Caltrans once the production line and laboratory are complete and ready for production. No production should begin without METS' verification that the facility meets our requirements.
