- Aaron & I took a trip out to the site, where 40 pieces of W36x162 that are to be the stringers for the E2 crossbeam were onsite. In addition there were a few of the tubular steel 10x10x1/2" at the site as well. I did not like the fillet weld I saw on some of these pieces. Although the fillet weld looks sound on the outside, there is a gap on the inside of some of these welds. I contacted B. Levell, a CWI with Mactech to help us with this issue. We will meet tomorrow morning at the site.
- Continued with the reading of the falsework plan.
- I was at the Winter Training on Monday, March 9 thru 12 and a CIDH training course on Thursday. On Friday, I was on vacation, hence no diaries for the entire week.

Inspector: Saman Soheili  Trans Engineer (D)/Asst. Struct. Rep
