NOTES:

I was informed this morning by Art Pannu that access will be available to the barge containing the driving frame for temporary tower D, at 1100 hours. Art called John Denis and I called Mark Baker to let him know of the meeting, but had to leave a voice mail for him. He was unable to make it, so Bill O'Sullivan, John Denis, and myself went on to the barge and looked at the components of the driving frame. Most of the welds appeared to be fine, but there are some areas I need to consult with Mark Baker about that are of a more technical aspect in the welding field. The layout of the components was done well and all pieces are fastened well too. Bill said that he is working on getting a permanent gangway set up so that we can access the barge at any time. He did say that we could use the boat any time to get onto the barge.

The remainder of the day was spent reviewing the Project Plans.

Inspector:

Jason Wilcox  Transportation Engineer – Civil (D)/Asst. Struct. Rep
