ABF		Skiff	1						7	115 Horse	

In the morning the crew inspected the whole site to ensure that the site was SWPPP compliant.

After they finished the SWPPP inspection the crew began plumbing the frame in order to stab pipe column #1. They had trouble getting the frame to move the way they needed to. In order to properly adjust the frame, B. Neal decided to stab pipe #1 and use it to push the frame where they need it.

The pipe went in without much trouble and they successfully used it to move the frame.

After the pipe was placed and plumbed the frame was closer to the correct location. B. Neal is planning on using the same concept to get the frame in its final position with the next two columns.

N. Vaneck arrived at noon.
