ABF		Skiff	1					7			115 Horse

In the morning the crew placed pipe column number 6. Ben believed that he would be able to pull the frame back into location by placing both pipes 5 and 6. After the placement of pipe #6, the cage seemed to have shifted back towards the proper location. Terry Dennis verified this. Ed Mendoza began welding the fin plates to the stiffener rings as soon as Terry verified the location was correct.

In the afternoon they placed pipe number 6. When Terry Dennis tried to verify that the pipe was standing vertical he noticed that the pipe bent at the top roughly two inches out of vertical. As a result Jim Davidson directed Ben to pull the pipe out and lay it back on the barge to be surveyed

Jim Davidson will decide whether or not to place the pipe based on the survey data.
