	5	Pile Driver – Journeyman												Henry Wheat		
	6	Operator												Tim Campbell		
	7	Oiler												Mel Thompson		
4100	1	Crane												Manitowac		

Owner's Meeting

- There was no work at Birth 7 on this day as the workers were gone to help loading up the 12 falsework piles on the barge;
- There was a conversation today with R. Erskin & Gil in regards to the shooting of the 4 Control Points (28, 29, 30, & 31) in addition to the 12 falsework posts (sandjacks.) We explained that due to the mechanical problem with the level, our numbers are quite different than those of the Contractor's and we need his help. Rick said that he needs to check with CJ. He received an OK from CJ following lunch but would only operate if we just need to verify coordinates of the 12 posts and would not verify the coordinates on the control points. There is a long history, some of which unknown to me, regarding the monument ABF is using. These monuments are different than those used by CT over the past few years. CJ & Rick do not like to open up the proverbial can of worms. We agreed that all he needs to verify is coordinates of these 12 posts.

Overtime 1 Hour

E2/T1

- I worked on getting the record logs straightened out for the CISS piles and paint. I have not had much success with the paint information and the pile records need to be deciphered carefully. I need to ask questions of those who were present during the driving of these piles to gather more information before I can complete this task.

Overtime 1 Hour
