- Shot elevations of Pier W2 cap beam to determine deflection of the cap beam due to the mass of the concrete poured.
- Compiled, circulated data collected at W2 cap beam
- The data I circulated was questioned. I discussed the data with Gilel Klebanov, Matt Bruce, Francis O'Malley, and David Adams. Adams, ABF surveys, will send me his data on the beam deflection.
- Next week I will check the elevations of the top of the beam to see if there is any subsidence.
