Description of Operation:
The 10 remaining pile were stabbed to the following depths (taken at the top of annulus)
F105: 36m F107: 36.5m F114: 36m F116: 35.25 F126: 36m
F106: 36.5m F113: 36m F115: 36m F123: 36m F128: 36.5m
Richard Hiebert informed me they plan to vibrate all the battered piles tomorrow.
The welding crew worked on the welding platforms which will be used during the pile splicing operation.
Troy Waller informed me that the maximum movement the surveyors observed was 5cm to the west, which is well within the 75cm they are allowed. The workers plan on pulling on the frame tomorrow before vibrating the piles in order to bring it as close as possible to on target.
Worked 1.5 hrs OT monitoring contractors field work/operations
