weekly internal meeting w/Gil.
 In the morning I returned a slump cone to the South-South detour connex box and picked up the wheelbarrow to return to the cure room.
 I helped Pam (CT) load cylinders into her truck to be transported to Sacramento.
 I started working on diaries and tracking down notes that I made during the concrete pour.
 Took Victor to the cure room and showed him the tops of the cylinders as an example of what a good uniform top looks like.
