REMARKS

Name	Classification	Prime / Sub

For ABF equipment/personnel hours, please see Pamela Gagnier's and Lalit Mathur's diaries.

I spent the day tracking down the wheel barrow (and filling the tire with air @ 'Rusty's and sons), cylinder-making instruments/slump cone and transported them to the South-South detour connex box. I also transported three boxes of cylinder cans to the connex box as well. I will arrive at 21:30 at the jobsite tonight to get them from the connex box.

Last minute review with the W2 team to discuss who is in charge of what. I printed out schedules/charts/mix designs for everyone's use. Lalit questioned why I did not give him a copy of the list of cylinders that will be made. I told him that only those that would be transporting them to Sacramento need the list so they know what they are picking up. He stated he did not know the list was changed because he was the one who originally wanted 60 cylinders. I told him that those were Gil's orders from the pre-pour meeting we had this past Monday, the 3rd of Nov. I told him that he was at the meeting and sitting right next to Gil when Gil made the change.

The jobsite shutdown at noon in preparation for tonight's concrete pour.
