June 20, 2006

RFI meeting at 0800. Again went over RFI1R1 with ABF. Proposed answer from TYLin still appears good. R Crockett clarified that they plan one field splice just West of PP13 and that PP8 – PP13 would be one lift with a shop splice 700 mm east of pp10 and west of pp14. Discussed RFI #4 with R Crockett indicating that their position was different from the last RFI meeting. There may be a difference in spec interpretation here, but it is too early to know if there will be any effect on the design. RFI #7 and #8 were also discussed briefly. Sent out the CD with CAD files to Dr. Sieble.
