	1	Elevator	8											ABF

REC'D H31 OCT-06 H011106

Weather: Foggy/cloudy morning, 54 F low 64 high. Medium winds.

Description of Operation:

ABF is working on clean up at ground and at the deck level.
ABF is using 3 dumpsters to collect the trash from formwork removal.

ABF is cleanng all debris from top of the lowered platform.
ABF continues with the grinding operation under the W2 on the south side.

The welders Henry and Harry continue welding additional stiffener plates to the W36 beams on the south-west sides.

ABF continues to work on Falsework and formwork removal for the VOIDS area.
Today the crew started almost 1 hour late as the ABF's safety supervisor came late. The crew can not get in till safety supervisor aloows them to go in.
The air quality was bad from the beginning. The meter went off twice in the first hour and continued to do so rest of the morning. At times the crew was there for a minute or so only.
The morning was total waste.

This is a confined space area. There continues problems with the CO levels reaching high levels as soon as a steel member is cut by open flame method. The meter warning sign went off twice in the 1st ½ hour.
Overall, the efficiency of the crew was hardly 25 % to 30 %.
RSC is not working today.

SDI continues with a crew of 5 people. SDI continues vulcanizing the HDPE pipes on the ground with a crew of 3 for Vertical Tie Downs. The length of each pipe is equal to 3 pieces joined, thus having two vulcanized joint. From the time to lift the pipe with a fork lift, put on the rollers, move it into position, bring the two ends together at the joint location, trim the ends to perfect sqaure ends, heat the joint and vulcanize, it takes about 25 to 30 minute per joint or about 45 min. to 1 hour per pipe fabricated to full length.
At end of the day, they completed 9 additional HDPE pipes today for a total of 16 pipes.

SDI's crew of 2 people is working on top of W2 preparing for stressing of vertical strands.

Additional Work at or outside of the W2 Site:

- CC Myers continues to work on foundations near W3. The foundation work seems to be coming to completion.
- CC Myers has erected last but one (group of 4) of the columns for the South Side Detour. They continue to erect additional towers/columns.
    - CC Myers had built the most of foundations and are ready for supporting columns.
    - CC Myers are erecting frames for Labor Day Week end work.
    - CC Myeers are looking in to the false work failure of yesterday afternoon.

- ABF continues to erect the Frames and trusses for Temporary Tower Columns from F & G.
- ABF continues to work on anchor bolts for tower H.

Lalit Mathur, P.E. _____ Trans Engineer (D)/Asst. Struct. Rep
