ASSISTANT RESIDENT ENGINEER'S DAILY REPORT CCO 106 Skyway Lowering

Location & Description of Operation The ringer crane to the south of EB Skyway remains in place and the ringer crane to the west of the Skyway is moved to the west near YBI so that it is north of the W-Line temp truss (item work). Then the ringer crane to the south of the EB Skyway is moved to the north of the WB Skyway. Then the barge with k-rail is moved from its mooring (to north) to the barge crane positioned north of the WB Skyway. At 10:00, the Barge is in position and ready to load k-rail to the WB Skyway. By 12:00, half the k-rail is placed and then the remainder is placed in the afternoon. The ringer crane is then moved to the west when k-rail placement is done. Note, crane only can place k-rail in the per plan location for some of the north stacks and a forklift moves the k-rail to the other locations. The forklift is operated by an ironworker.

HOURS - ITEM NO.: CCO 106-Counterweight

WEATHER: Clear

EQUIPMENT AND / OR LABOR:

EQPT. NO.	NO. PERSONS	DESCRIPTION (Of Equipment or Labor)	CCO 106-Counterweight	IDLE OR DOWN	REMARKS (Reason for Idleness or other remarks)
