Assistant Resident Engineer's Daily Diary
For: Stanley Ku
Week of 10/01/12-10/05/12
04-0120F4

10/01/2012 Monday Fine

I attended staff meeting and checked details for façade access opening to identify the problem that at some locations, there might not be adequate space for lock.

10/02/2012 Tuesday Fine

I converted 100 shop drawings into tiff format. To date, 1100 shop drawings have been classified as As-Fabricated drawings and converted into tiff format. I sent out transmittal 05.03.02-001595 to ABF to request As-Fabricated stamp. This transmittal contains 100 shop drawings. Mohammad, Sammi, and I visited tower head to measure dimensions on access opening, in respect to tie rod, between tower saddle housing and tower saddle.

10/03/2012 Wednesday Fine

I attended senior meeting and continued checking details for fabricating and assembling ladder in tower saddle.

10/04/2012 Thursday Fine

I attended safety meeting and continued checking details for fabricating and assembling ladder in tower saddle. The weekly tower meeting was cancelled by ABF.

10/05/2012 Friday Fine

I started checking details for fabricating and assembling diaphragms at elevation 9m and 13m.

10/17/2012
