Dispute

Work description.

- Wrote outstanding diaries not completed to be up to date.
- Reviewed Submittal 1684R00 "West Deviation Saddle Erection Plan" mostly for surveying. However I did have other comments related to the grouting, stressing, and erection.
- Moved the 4 cylinders for compressive strength for the WB continuity tendon blockout concrete placement to the water bath near the South South Detour trailer with the assistance of Jason Wilcox.
- See Lalit's diary for Conco/ABF labor, equipment and other operations.

Attachment

ABF/Conco began to lift the W2E retaining wall precast slabs off of the soffit, see Lalit and David Bradds diaries for more details.
