Dispute

**Work description.**

- Placed marks for surveying the tower deflection during pullback operations with Sami Daouk and Roman Granados.

- Dealt with issues regarding the surveying equipment received by Topcon of Sacramento. The dealer is requesting payment for software (pocket 3D) that should have been included in the original package. Looked into returning this unit to Topcon Sacramento and purchasing from Engineering Supply Company salesman Chuck Madrid. The package that Chuck submitted had software more geared towards surveying structures as opposed to agriculture from Topcon Sacramento. I also called Theresa Vargas (Headquarters Purchasing) who was responsible for the Purchase Order payment to inform her of whats going on with the equipment received. Regardless of which unit will be purchased I am still waiting on the AT&T Sim card from Wil Bunkley in the District 4 Office.
