**Work description.**

- Continued to review the plans and submittals (207 and 2505) related to the cable bands. Continued to develop the inspection checklists for this item of work.

- Continued to prepare equipment for the QA check on the cable band layout. Also continued to work on refining the QA checking techniques to ensure timely/efficient inspection and to be prepared to troubleshoot any problems that may arise in the field during this operation.

- Checked to see if there was any activity at the Pier 7 warehouse with the cable bands as most of them are still wrapped up with inspection tags fixed on the wrapping. Also went to the bridge to check the progress of demobilization to gauge how much time I have to prepare for my upcoming inspections.

- Wrote outstanding diaries and completed cable strand adjustment check sheets.
