<p>BOLTS FOR MEP AT HINGE A; BOLT SHIPMENT SAMPLING: LeJeune bolt shipment number 177 arrived yesterday and is sampled today with METS. Sampling are Bob Brignano from CT Construction and Scott Croff from CT METS. The material sampled is 1 lot of 1/2" material without washers (bolts and nuts only), 3 rocap lots of 3/4" material, and 1 lot of 3/4" material without washers (bolts and nuts only). There is also 1 lot of 3/4" split lock washers, but no certs are available, so I inspect the material on site and field release it. In addition to pulling METS QA samples, I pull on site rocap samples for the 3 rocaps. Material is QA sampled on site rather than at the source per agreement with ABF and METS to expedite material delivery to the site and reduce METS travel expenses.</p>
