Work description.

Inspector: Victor Altamirano (8 hours reg.)
 Date: 012114
 Location: West of OTD building test area

Field Work –

Workers attached come-alongs to k-rail lugs and attached a strap to come-alongs and looped it around the jacking beam for TR 7. This was done to re-align the jacks and jacking beam. Workers also unbolted four (4) bolts from the jacking end plate in order to have access to install steel shims to keep the jacks from swirling during jacking. Note that each pair of jacks was installed parallel to each other with each collar facing away from each other. This was not the case on any of the other test rigs.

Workers are planning on making the shims tomorrow morning.

ABF engineer: K. Chen (8 hours regular)

Office Work -

I finalized diaries and extra work bills.
