**General Comments**

CCO 314, SAMPLING AND TESTING A354 GRADE BD MATERIAL:

There is no work in the field on this operation today by ABF. The Townsend Test (Test IV) for TR's 18 & 19 setup work is ongoing. ABF is working in the field today (but not at the Pier 7 warehouse area) on other operations this Saturday – ABF is working on the maintenance traveler and the T1 tower. The other operations are not covered by this diary.

**INSPECTOR OT REMARK:**

Office 6 hours: ABF is not working in the field on CCO 314. I am in the office for various work related to A354 Grade BD bolts and rods, including issues for the DJV, CT-METS, next week's scheduled start of loading in TR's 18 & 19, and addressing EWB's due early next week for this month's estimate. I am also in the office for another issue – compile information for the as-built and final report for the cable band bolt tensions, with this being requested from me yesterday for use on Monday. My shift and OT are 0900 to 1530.
