General Comments

CCO 314, SAMPLING AND TESTING A354 GRADE BD MATERIAL:

Weather Note: There are rain showers overnight before the start of the shift. The rain showers result in a lake or pool of water in the area of the intentionally plugged DI (per approved SWPPP). This pool or lake of water shrinks during the day but is not gone by the end of the shift. There are no rain showers during the shift - it is dry for the remainder of the day.

There is no work in the field on this operation today by ABF. The Townsend Test (Test IV) is complete and cleanup is in progress. ABF is working in the field today on other operations. The other operations are not covered by this diary.
