General Comments

CCO 314, SAMPLING AND TESTING A354 GRADE BD MATERIAL:

There is no work in the field on this operation today by ABF. The Townsend Test (Test IV) is complete and cleanup is in progress. Crews at the Pier 7 warehouse are working an 8-hour shift 0700 through 1530. ABF is working in the field today on other operations. The other operations are not covered by this diary.

CCO 376, PWS ANCHOR ROD ADJUSTMENT:

Today I get from the ABF office the last of the PWS anchor rod components loaned from CT to ABF on 5/19/2014. Returned to CT today are 3 jam nuts and 2 couplers. I return the material to the CT-METS A354BD material storage conex.

INSPECTOR OT REMARK:

Office 2 hours: ABF is working a shift at the Pier 7 warehouse area between 0700 and 1530, but I am not in the field for ABF operations today. I am in the field for a few hours with others from CT to survey the stored materials in the warehouse and the storage yard down Burma Road to determine which items can be discarded under the current contract with ABF. I am also in the office for various work related to A354 Grade BD bolts and rods. I work later in the afternoon on A354 Grade BD issues, including reviewing EWB's due tomorrow. My shift is 0700 to 1730 and my OT is 1530 to 1730.
