Item	Title	Detail
1	Logistics	Dave McClary, Ady Velasco and I used a taxi cab from the Marriott hotel to the ferry dock to Changxing Island . In order to aide the driver, we used a detailed map which showed the cab driver how to get from the hotel to the dock. We timed the travel at approximately 45 minutes with the fare costing 88 RMB (approximately \$11.75 USD).
2	Meetings attended	At 1330 hours I attended the Fabrication Issues meeting with ABF/ZPMC, Jim Merrill, David McClary, Ady Velasco, Stan Ku, Alistair Melville, Sean Eagan. Highlights from the meeting were: <ol style="list-style-type: none"> 1. ZPMC discussed the tolerances for the T-joints formed by the longitudinal stiffeners and Tower skin plates and requested clarification on what required Engineer approval before heat straightening. METS stated they would need to discuss consider the Contractor's question internally before providing an answer. 2. ZPMC discussed the possibility of using localized heat to bend the Tower diaphragm flange plates in lieu of sending the plates to be heated and bent at the Wuxi Boiler facility. Jim Merrill expressed METS' concern with allowing the localized heating and stated that the Department would not consider the request. 3. METS stated that the audit of the facility which will machine the diaphragms should be completed next week in order to get the audit completed before Jim Merrill traveled to Korea. ABF/ZPMC agreed to expedite this if possible.
