Summary of Items Observed:

Caltrans Quality Assurance (QA) Inspector, Mr. Paul Dawson, arrived on site at the Zhenhua Port Machinery Company (ZPMC) facility at Changxing Island, in Shanghai, China, for the purpose of monitoring welding and fabrication of the San Francisco / Oakland Bay Bridge (SFOBB) components. The QA Inspector observed the following:

Orthotropic Box Girder (OBG) Fabrication

The QA Inspector performed random visual inspections of deck plate DP381-001 closed rib welds #2 through #10. The QA Inspector used a yellow marker to identify locations on these welds that have various degrees of weld insufficient fill, weld overlap, and other similar weld conditions. The results of these inspections were documented on forms titled: "Caltrans QA Visual Weld Inspection Report for the OBG Deck Panels". These completed forms were submitted to Caltrans engineering for review. See the photograph below showing typical weld defects in deck panel DP381-001.

WELDING INSPECTION REPORT
