On this date Caltrans OSM Quality Assurance (QA) Inspector Larry Viars was present during the times noted above for observations relative to the work being performed.

West of Bay 14-

Caltrans QA Inspector performed Ultrasonic Testing (UT) verification of welds previously tested and accepted by ZPMC for OBG Segment 11EW welds. See UT report TL-6027 generated this date for additional information. The following welds were tested:

SEG073A-004 and 007

Caltrans QA verified that OBG Segment 11EW areas marked for repair for unacceptable weld profile were repaired by ZPMC personnel as requested.

Bay 16-

This QA Inspector observed the following work in progress: Flux Cored Arc Welding (FCAW) of OBG Segment 13AW Longitudinal Diaphragm manway weld, LD3031-001-007. ZPMC welder was identified as 045204. ZPMC QC was identified as Xia Chun Hui. ZPMC CWI was identified as Geng Wei. The welding appeared to be in conformance with welding procedure specification, WPS-B-T-2213-1.

WELDING INSPECTION REPORT

(Continued Page 2 of 2)

Blast Bay 2-

Caltrans Quality Assurance (QA) Inspectors performed random visual inspection of Lift 2 North Tower Shaft exterior weld base material surfaces. Areas requiring light grinding were marked for ZPMC personnel. Items which require repair were recorded for future repair.

Unless otherwise noted, all work observed on this date appeared to generally comply with applicable contract documents.

Summary of Conversations:

Only general conversation occurred this between QA and QC this day.

Comments

This report is for the purpose of determining conformance with the contract documents and is not for the purpose of making repair or fit for purpose recommendations. Should you require recommendations concerning repairs or remedial efforts please contact Eric Tsang, 150 0042 2372, who represents the Office of Structural Materials for your project.
