Caltrans Quality Assurance (QA) Inspector, Ken Jobes, arrived on site at the Zhenhua Port Machinery Company (ZPMC) facility at Changxing Island, in Shanghai, China, to randomly monitor welding and Quality Control (QC) functions. While on site, the QA Inspector observed and/or discovered the following:

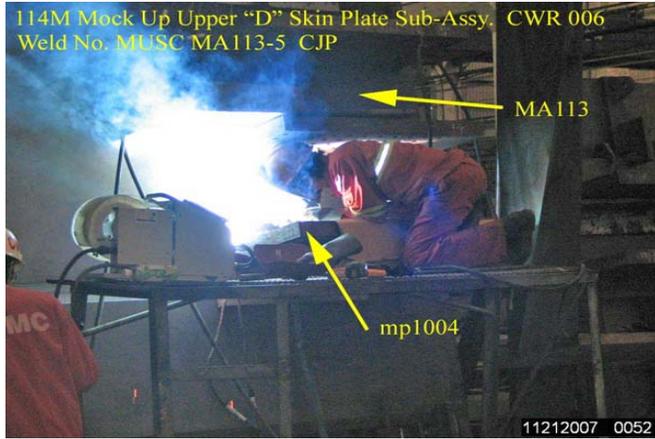

The Caltrans QA Inspector observed the repair welding (Critical Weld Repair No. 006) of Piece Mark mp1004 stiffener to Piece Mark MA113 for the 114M Mock-Up Upper (Top) Plate Panel "D" Sub-Assembly. The weld was identified as MUSC-MA113-5 and is a complete joint penetration (CJP) groove weld welded in the flat (1G) welding position. The welder was Tao Qian (Welder I.D. No. 040457). Welding Procedure Specification (WPS) 345-FCAW-1G(1F)-Repair, for Flux Cored Arc Welding (FCAW) was used for this weld. The Drawing No. is MUSC-MA113, Rev. 0 and the Member ID. is MA113 - mp1004.

ZPMC CWI, Chen Xi (CWI No. 07072021) and Bureau Veritas Inspector, Li Wen Sheng were present during all of the above welding.

The QA Inspector also observed that the ZPMC CWI was documenting the parameters as welding progressed and that the random verification by the QA Inspector essentially confirmed the QC documentation for the random sample, and that QC documentation showed compliance with the WPS up to the time of the random sample.
