The Quality Assurance Inspector (QAI), Scott Croff, was present at the Self Anchored Span (SAS) job site to observe the scheduled fabrication and welding of components for the SFOBB project.

The QAI reviewed contract related documents including the submitted and approved Welding Quality Control Plan (WQCP) and revisions to the WQCP. The QAI continued reviewing informal copies of the contractor's welding report submittal #s 1536 Rev. 31 thru Rev. 33, for conformance to the contract requirements. The QAI was given an informal copies of the contractor's welding reports for field splices 1E/2E and 2E/3E. The QAI was informed that these reports should fill in all the identified missing reports from the tracking lists provided to the contractor. The QAI continued consolidating the information from previous welding report submittals to identify missing reports of inspections. The QAI continued generating a weld specific tracking list from the contractor's welding reports.

The QAI completed reviewing the informal submittal packages (weld report number 26 and number 27) and noted that all reports appear to comply with the contract requirements. The QAI met with the Quality Control (QC) Inspector William Norris and relayed these observations of the informal submittal reviews. The QAI was informed that these reports will be formally submitted at a later time.

Summary of Conversations:

The QAI had general conversations with ABF and Caltrans personnel during this shift. As noted above, the QAI had a conversation with the QC Inspector William Norris regarding the informal review of welding report submittals. The QAI relayed the status of submittal reviews to the QAI Lead Bill Levell. Except as described above, there were no other notable conversations or observations.
