The Quality Assurance Inspector (QAI), Scott Croff, was present at the Self Anchored Span (SAS) job site to observe the scheduled fabrication and welding of components for the SFOBB project.

The QAI reviewed contract documents at pier 7. The QAI used approved weekly welding report submittals and cross referenced the welding and inspection status as reported with QA records to identify the overall weld status. The QAI received informal weekly welding report packages 81 and 82 for cursory review. The QAI noted that the weekly welding report packages are not priority and continued reviewing submittals 1536R82, 1536R83 and 1536R84 for conformance with the contractor requirements. This work was in progress at the end of the shift.

**Summary of Conversations:**

The QAI relayed the status of document reviews to the QAI Lead Bill Levell. Except as described above, there were no other notable conversations.

**Comments**

This report is for the purpose of determining conformance with the contract documents and is not for the purpose of making repair or fit for purpose recommendations. Should you require recommendations concerning repairs or remedial efforts please contact Nina Choy (510) 385-5910, who represents the Office of Structural Materials for your project.
