Structure**Summary of Items Observed:**

The Caltrans Quality Assurance Inspector (QAI), Scott Croff, was present at the Self Anchored Span (SAS) job site to observe the scheduled fabrication and welding of components for the SFOBB project.

The QAI reviewed contract documents at pier 7. The QAI used approved weekly welding report submittals and cross referenced the welding and inspection status as reported with QA records to identify the overall weld status. The QAI began reviewing submittal 2588R7, for conformance with the contract requirements. The QAI continued reviewing additional welding report documentation. This work was in progress until the end of the shift.

The QAI noted that Bleyco personnel were observed working on the Skyway bikepath. The QAI noted that the work being performed is not contract / welding specific and no additional observations were made. The QAI noted that stud welding and other contract related welding is pending at this time and their work schedule has not been determined.

Summary of Conversations:

The QAI relayed the status of the document reviews to the QAI Lead Bill Levell. Except as described above, there were no other notable conversations.

Comments

This report is for the purpose of determining conformance with the contract documents and is not for the purpose of making repair or fit for purpose recommendations. Should you require recommendations concerning repairs or remedial efforts please contact Gary Thomas, (916) 764-6027, who represents the Office of Structural Materials for your project.
