Summary of Items Observed:

Quality Assurance Inspector (QA) William Clifford was at the American Bridge/Fluor (ABF) job site at Yerba Buena Island in California between the times noted above in order to monitor Quality Control functions and the in process work being performed by ABF personnel. The following items were observed:

Ultrasonic Testing of ESW

ESW D, Face A:

This QA performed continued Ultrasonic Testing (UT) on approximately 2000mm of Tower Electroslag Complete Joint Penetration (CJP) shear plate weld designated as "ESW D" face A. Location (Y=4000~6000) of this weld was inspected using this testing method.

This QA observed no recordable longitudinal indications at the time of testing.

This QA observed no recordable transverse indications at the time of testing.

This QA performed UT of weld designated as "ESW D" in accordance with the approved supplemental procedure for confirmation and evaluation of planar type defects. Tandem report for work performed on this date will be completed by QC technician and signed by both QA/QC parties. Items listed on tandem report reflect indications agreed upon by QA/QC. Please see TL-6027 for complete listing of QA recorded indications.

Unless otherwise noted, all work observed on this date appeared to generally comply with applicable contract documents.

Summary of Conversations:

WELDING INSPECTION REPORT
