Summary of Items Observed:

The Caltrans Quality Assurance Inspector (QAI), Scott Croff, was present at the Self Anchored Span (SAS) job site to observe the scheduled fabrication and welding of components for the SFOBB project.

The QAI reviewed contract documents at pier 7. The QAI used the welding report submittals and welding report packages to cross reference the welding and inspection status as reported with QA records and to identify the overall weld status of work reported as complete and in progress. The QAI continued reviewing the contractor's reports and referencing the Requests for Weld Repair (RWRs) in order to determine the status of completion of the repairs of Electro-Slag Welds (ESW).

The QAI also assisted in the PWS anchor bolts testing setup that is ongoing.

* The QAI also worked on the 04-0120M4 project during the time listed on this report, the hours worked will be respectively charged and the work reported to the contract.

Summary of Conversations:

The QAI relayed the status of the document / submittal reviews to the QAI Lead Danny Reyes. Except as described above, there were no other notable conversations.

Comments

This report is for the purpose of determining conformance with the contract documents and is not for the purpose of making repair or fit for purpose recommendations. Should you require recommendations concerning repairs or remedial efforts please contact Gary Thomas, (916) 764-6027, who represents the Office of Structural Materials for your project.
